LIPINSKI SOUND CORPORATION

Lipinski Sound Corporation was founded in 2003 in Bethesda, Maryland, in the greater Washington, D.C. area, by Dr. Andrew Lipinski - an internationally recognized recording engineer and producer, educated in Europe, based in the United States, and active on projects worldwide. The company was later led by his son, Lukas Lipinski, an economist with an MBA and a background in U.S. government contracting.

Andrew Lipinski's exceptional gift of perfect hearing was formally acknowledged by the U.S. National Bureau of Standards, where he became the only individual ever to achieve a flawless score in the official listening evaluation of phonographic recordings (NBSIR 88-3725). The report highlighted this rarity: "...one listener achieving a perfect score... A score of 10 correct out of 10 selections would be expected only once in a thousand trials."

His expertise influenced U.S. Congress in a landmark decision to preserve national quality

standards for a unified listening code, rejecting an alternative standard proposed at the time by CBS. This recognition and impact established Dr. Lipinski not only as a technical authority but also as a figure whose precision shaped the future of professional audio standards in the United States.

Our professional clients include not only Grammy-awarded artists like Beck, Justin Timberlake, and the late Prince, but also major Hollywood studios such as Universal Studios Mastering, United Artists, and Warner Bros. Additionally, AfterMaster—renowned for producing the most platinum records in history—and Dolby Labs in Tokyo and Stockholm rely on our gear.

Moreover, leading music institutions, including the Peabody Institute in Baltimore, Cleveland Institute of Music, Berklee College of Music, New York University (both New York and Abu Dhabi campuses), and the Fryderyk Chopin University of Music,

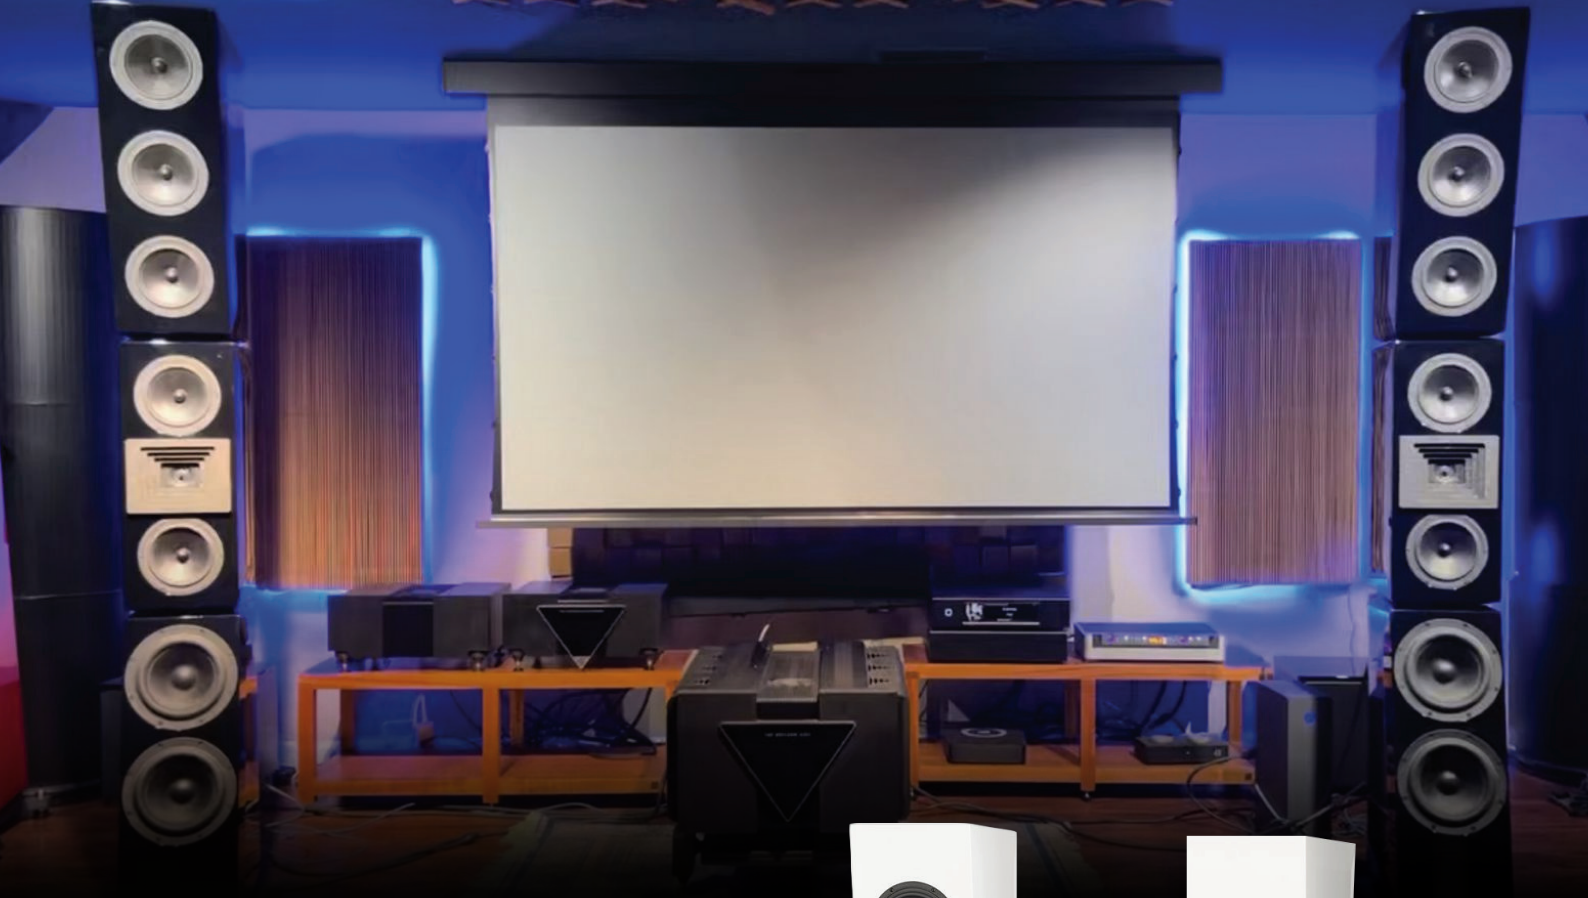

utilize LIPINSKI systems in their most critical rooms. The Department of Defense and the President's Marine Corps Band, based at the Naval Yard, use our systems in their mastering room to produce recordings of performances held at the White House and other prestigious venues.

Since 2004, the audiophile label Mobile Fidelity, based in Sebastopol, California, has trusted LIPINSKI Sound monitoring systems to deliver the highest fidelity in their recordings.

With over 60 years of research and development, our company continues to deliver unmatched sound quality to clients worldwide.
